NYC pays 18,000+ vendors. Consolidating the tail could save $149M/year

$149M

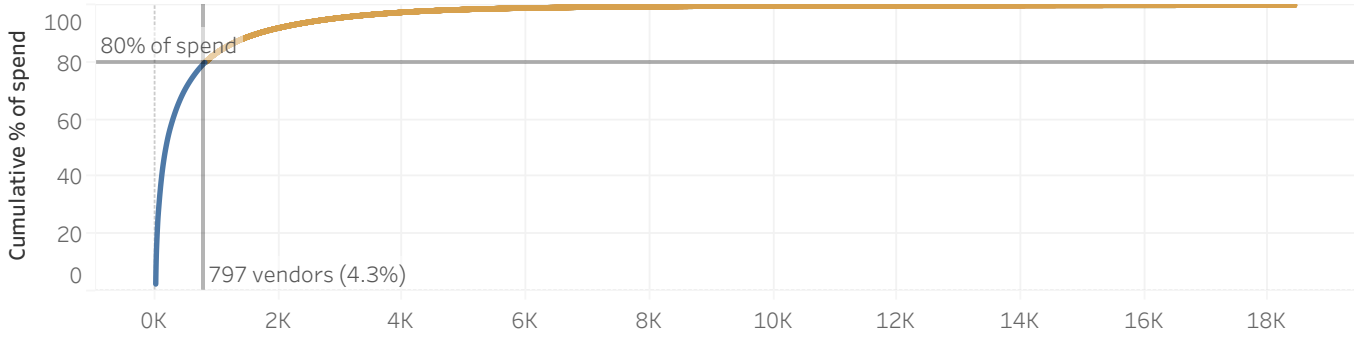

Realistic annual savings

$620M

Theoretical ceiling, if all tail spend were consolidatable

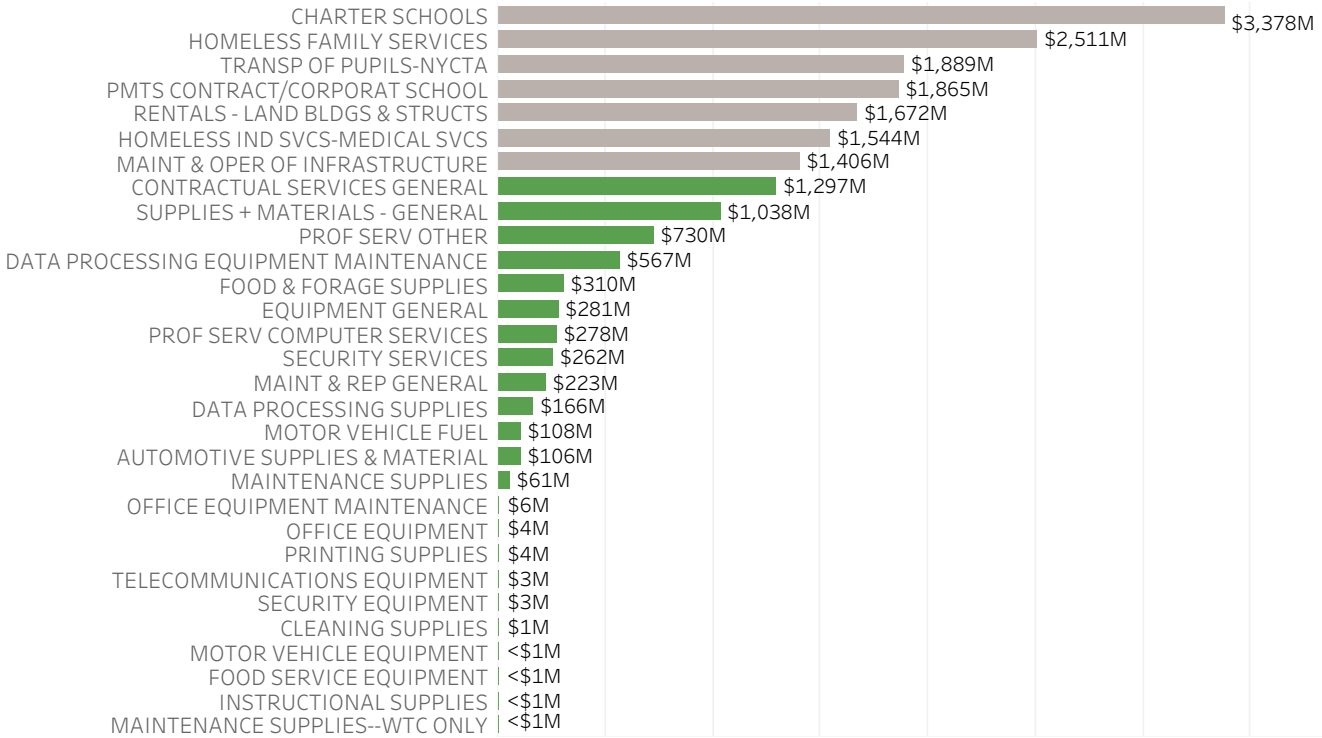

$6.20B tail spend
$1.49B in target categories
× 10% consolidation benchmark

$149M realistic annual savings

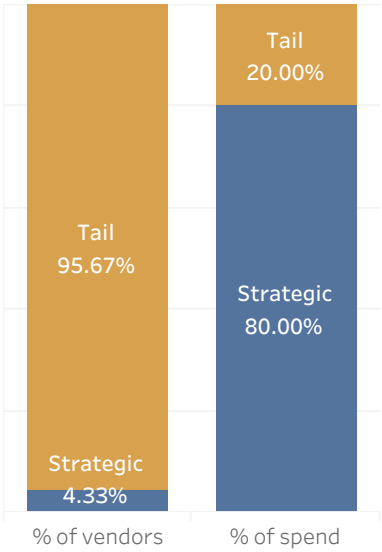

Where the money is and what's consolidatable

All 23 target categories, plus every excluded category ≥ $1B. Excluded categories stay visible so the chart shows what the analysis chose not to count.

Strategic vs. Tail

Strategic = the 797 vendors inside the top 80% of spend.
Tail = the remaining 17,626.
